CASE STUDY: SUPERFLASH BANK

M-CUBE & PUSHPULL: AUDIO & VISUAL INFOTAINMENT IN THE SUPERFLASH BRANCHES

Intesa San Paolo Superflash branches, a new concept of banking for the 'under 35's'

Intesa San Paolo has launched in 2009 a new banking service for the under 35's, "Superflash". The program aims to support the younger clientele plan for their future with savings, investments and mortgage services tailored to their needs. The service is provided entirely online.

In 2011, Superflash sees the opportunity to open Flagship stores to provide a more extensive service combining the online experience and the banking services in the branches.

The Superflash branches are going to be a retail bank to all effects although services are not going to be provided over the counter. The concept is to create an environment suitable for the young generation. It is going to be a meeting place where the bank offers guidance, consultancy, training and hosts special events to attract young people; such as concerts, sports events, fashion shows and cultural events.

A NEW CHALLENGE

The branches are spacious open plans areas offering quick and easy computer access and free Wi-Fi connection. Superflash is also looking to deploy audio and visual digital media to provide an engaging communication comprising public announcements, live conferences, information on new products and upcoming events in the branch.

SOLUTION

Intesa San Paolo after evaluating a number of service providers has identified M-Cube and PushPull as the suitable partners for the Superflash digital media communication project.

PushPull is a well-known radio producer company and a trusted M-Cube partner since 2004. The two companies collaborate to manage the Superflash Radio broadcasting online and in-store. M-Cube also manages the development and implementation of the digital signage network.

Intesa San Paolo SUPERFLASH Branch

- **Superflash**, part of Intesa San Paolo, offers banking services to the 'under 35's'
- Inauguration of the first Superflash Flagship store:
 September 2011, Milan
- 2012: 8 Superflash branches in Italy Milan, Torin, Napoli, Bologna, Florence, Palermo, Padua, Rome

CASE STUDY: SUPERFLASH BANK

DIGITAL SIGNAGE

All Superflash branches have been fitted with a video wall in the central area where events and conferences take place, and a monitor placed in the front window. The latter's provide passersby with information on the branch opening and closing times, upcoming events and general sales information.

M-Cube is providing a "turnkey" service based on the digital signage platform Scala. The company manages the digital signage network with a fortnightly content update of the videowalls and window displays in all the branches.

SUPERFLASH RADIO

All Superflash branches have also been provided with the M-Cube in-store radio service, which broadcast the existing Superflash Radio program available online.

PushPull has been managing the online Superflash Radio for sometime and has also created the music competition named Musicflash. The competition promotes the music of talented young people. The artists can upload their music to the website www.superflash.it and a panel of judges selects the best musicians who can enter the competition. The songs are played on Superflash Radio online and in the branches via the in-store radio. The public vote online for their favourite artist. The winner is invited to perform live in one of the Superflash branches.

On top of updating the event programs and managing the network, M-Cube has also developed a system to guarantee the multimedia integration between the in-store radio and the video wall. So that the volume of the music of the in-store radio player is turned down when the video wall broadcast goes live and sound is necessary at this moment in time. For example, an interview or a seminar is being shown.

BENEFITS

The digital signage and in-store radio, have met Superflash objectives of creating an engaging communication with its audience. It skillfully integrates the on and offline communications, providing an informative service which supports the bank activities to make banking attractive to the young generation.
